

## How to play:

- 1 Circle four binary numbers from the selection below
- 2 When each denary number is called out, convert it to binary
- 3 Compare it to each of your circled selections. If you get a match, cross it out
- 4 When all four of your selections is crossed out, shout BINGO! If you're the first, you've won!

## **Choose your FOUR binary numbers**

7070	7777	1100	7000
0010	7007	0100	0017
0110	0707	1110	1101
0111	0000	1011	0001

## Use this section to convert the numbers called-out into binary.

Denary	8	4	2	1
